John Deere Light Running Binder

"It's the lightest-running binder ever built." That is the verdict of grain-growers who have used the Light-Running New John Deere.

That easy-to-use, so much desired, is a quality built into the John Deere factory—the result of knowing how.

THE LIGHT RUNNING NEW JOHN DEERE GRAIN BINDER

Eight sets of bearings, roller and ball, self-aligning; also means for thorough and convenient lubrication. Every oil hole is easy to get to; every operating part can be oiled properly to reduce wear and lighten draft.

Great strength; wide suspension-type steel wheels; strong, hot riveted frame; rigid platform and elevators.

Improved wheel lift and shifts easily—cannot sag or whip.

Elevators of big capacity; no waste, no clogging.

Improved guard and sickle—made like a mower cutter bar. Easy to replace. Handy bundle carrier. A boy can operate it. Does not scatter bundles.

All steel quick-turn Tongue Track. Wheels hold to the ground. Relieve horses of side draft and neck weight. Keeps binder running straight. Flexible axle—both wheels conform to uneven grounds.

Don't Be Deceived

You'll find the casual, inexperienced or unprincipled dealer here and there who will give you an inferior imitation of Orange-CRUSH if you let him. This type of buccaneer palms off an imitation drink for the sake of a fraction of a cent more profit per bottle. Don't let this type of buccaneer fool your boys and girls!

But most dealers are honest. Most dealers hand out Orange-CRUSH when you ask for it. Although Orange-CRUSH costs them more than they pay for inferior imitations, yet a larger volume of sales brings in steady, increasing profits. Patronize the honest dealer who not only stocks this genuine, fruit drink, but gives you Orange-CRUSH when you ask for it.

Every Season Helps to Make It— Every Season Makes You Want It

ORANGE-CRUSH—Fresh as a Spring breeze in April—Enriched by the radiance of August—Sparkling like frost in November—Pure as new snow in December.

Enjoyed in 47 different countries of the world, and here's the reason why: To healthful, carbonated water is added the juice of luscious oranges—the delicate flavor of their peel—the zesty tang of the fruit acid found in oranges, lemons and limes—a pure food color, such as you use in your cakes and candies—pure cane sugar. Nutritious, wholesome—a delightful thirst-quencher!

And always—identify the genuine by the name Orange-CRUSH blown right into the Kinkly Bottle.

At mealtime in your own home, and when friends drop in for a visit, you can always have delicious Orange-CRUSH at a moment's notice by ordering it by the case of 24 bottles from your dealer. Phone him today.

Lemon-CRUSH Lime-CRUSH

New C.P.R. Cold Storage Cars

Under old conditions there was always a certain amount of risk in shipping fruit. The entry of dust or cinders, or the high temperature of the car, was frequently the cause of fruit becoming spoiled during transit. But under present conditions, fruit not only retains its coloring, freshness and firmness when it is shipped from one point to another, but it is actually improved.

For many months officials of the Canadian Pacific Railway and the Dominion Express have been carrying on experimental work with a new type of ventilated express car to be used in the handling of soft fruits by express to prairie points, and they have recently arrived at an entirely new method of ventilating express equipment, which is known as the "H. C. Ventilator."

This device allows the air to be received into the car through two spacious intakes located at the ends of the car at the roof, carried to the floor without decreasing in velocity and effectively distributed through the lower sections of the car. Three times a minute there is a complete change of air, 10,276 cubic feet of air per minute being recorded through the intakes and 9,522 through the exhausts.

The new type of ventilator was tested under full load conditions

New type of fruit car showing special ventilators, on the top of the car, which aid the fruit to retain its freshness. Lower picture shows interior of the modern fruit car. This month, the car containing more than 10 degrees lower than the outside air, during the entire trip. The side air, during the entire trip. The strawberries arrived in perfect condition. At the end of the journey not a single speck of dust could be found on top of the boxes, and the average temperature of the car was

Sons of England Visit Motherland

Two minutes before sailing on the Cunard liner Ascania, this large party travelling under the auspices of the Sons of England Society, was photographed on the aft deck of the ship. The party numbered six hundred and will include a tour of London, Paris, and the French and Belgian battlefields.

S. G. TOBIN, M. P. ON OUR PROBLEMS

ADDRESS OF MR. S. G. TOBIN
TO GOVERNOR GENERAL'S
SPEECH

Delivered in the House of Commons
on Thursday, January 28, 1926
(Continued from last week)

It has always been my hope that one or other of the great transcontinental lines would take over the project, complete it, and carry it on as a part of its system. In this constituency, of which I am proud to be the representative, there are a number of thrifty towns along the Calgary and Edmonton railway and we have one of the finest mixed farming countries in the Dominion. We have also a number of excellent lakes, among the finest in Western Canada, the Sylvan, Gull and Pigeon lakes. Those who are fond of angling will find it a delight to visit the district, and I can welcome any Nimrod who is not afraid to face a moose, any number of which may be found in the western part of the constituency. We have also a fine experimental farm at Lacombe, a branch of the Dominion experimental farm, which is doing splendid work. It served an eminently useful purpose when the newcomers were there and it did excellent work in the transition period between grain growing and mixed farming. At the present time all varieties of experiments are carried out on the farm.

The following is a list of the number of plots on which field record were kept during the season of 1925:

Cereals	1731
Field Husbandry	531
Forage Crops	761
Miscellaneous: Rust and Smut Control, etc.	152; A total of 3175.

I also noticed the number of varieties of field crops. These were:

There were 475 varieties made up of wheat, oats, barley, peas, winter wheat, rye, grasses, sunflowers, vegetables, etc.

Out of these selections they were experimenting on 1,022. I merely mention this to show the amount of work that is going on there and to indicate to what extent advice is available to the farmers. When last I visited the farm I was informed that there were 475 different methods of soil cultivation under test, as well as its varieties of rotation crops. There is absolutely no question about the value and extent of the information which the settlers get from this farm, either in the form of the annual reports, seasonal pamphlets or correspondence. The superintendent showed me that in 1925 he had received about 6,000 letters and sent out 7,000, and that about ten farmers a day on the average visited the farm. In addition the staff often give lectures at country places and farm meetings.

I wish to refer for a moment to an important subject mentioned in the Speech from the Throne—Transportation. Although I may appear to be speaking more particularly of western conditions, I hope to demonstrate to the House before I have finished my remarks on this subject that I am considering the whole Dominion. For a long time, as hon. members know, the west stood still. Although the Pacific ocean is only 750 miles from our door, no grain was moving westward, and we began to wonder, Sir, whether the country was wrong or whether fundamentals were wrong. We are still satisfied that the country is all that it is supposed to be, but we have come to the conclusion that the fundamentals in some respects were wrong. What was wrong? The high cost of transportation to and from the Pacific coast. In 1922, for example, it cost 21 cents per 100 lbs. from the range points to Fort William and 25 cents per 100 lbs. If the rate structure were on an absolutely just basis the former rate should be 20 cents, but we are not finding fault so long as we are making progress. But after we get to Fort William all is chaos with respect to rates. From Edmonton to Fort William a distance of 1,250 miles, the rate, as I have said, is 26 cents per 100 pounds; there to Montreal, about 1,020 miles, it is 34 cents per 100 pounds. Now, hon. members, have been discussing whether grain should go to Quebec or Montreal. Well, if our rate over the Transcontinental, as section of the Canadian National is to continue to be prohibitive, how can we expect grain to flow to either of those ports? If we want grain to go over that line we must give it a chance—the rate must be reasonable. We could not send grain to the Pacific coast when the rates were too high.

there was no more chance of sending it westward than if we had no railway at all. How can we expect grain to go over the Transcontinental at a rate of 34 cents for a little over a thousand miles as against the rate of twenty-six cents for the 1,250 miles separating Edmonton from Fort William? If we really want our grain to go eastward over our own lines to Canadian ports a reasonable rate must be struck, otherwise it will find a cheaper outlet.

It would be very improper for me to make any comparison between Montreal and Quebec, but as I see it the better of the two ports would be Quebec, because on the eastward haul Quebec is 60 miles shorter on the Transcontinental haul and is 170 miles nearer the Atlantic. Once we get our grain to either of those ports we must depend for ocean transportation on lines or trans-steamers. When imports were greater than exports the liner came in with a cargo and returned with another cargo of mixed freight. Today she sometimes looks for grain. If one of these liners is not available we have to rely on the tramp steamer, and if she is looking for a one-way cargo naturally she will prefer to get a cargo in Quebec or along the coast and thus save the 150-mile trip to Montreal. Therefore we must very seriously consider the whole subject of transportation if we are to send our grain eastward over an all-Canadian route. If the advantage is in favour of Portland and other Atlantic ports of the United States then will certainly flow that way. I find in the 1923 report of the Department of the United States that in that year New York got 63,000,000 bushels of Canadian wheat, Philadelphia, 23,000,000; Baltimore, 15,000,000; Norfolk, 12,500,000; Portland, 7,750,000; Boston, 7,000,000.

I contend, Sir, that we are entitled to an equalization of freight rates east as well as west, and then the farmer's grain will be sent over whichever route is the more economical. Our railways were built to serve the people, not to exploit them. I have no fault to find with the management of the Canadian National Railway or of the Canadian Pacific Railway, but first and foremost they are railway men, and naturally they view the question of freight rates purely from the point of railwaying rather than from the wider point of view of their effect on the national welfare. Therefore in our desire to build up a united Canada we are, as legislators, I submit, properly functioning in advising the railways how they should operate their roads in the best general interests of the public. I am not what government was in power when the railway was built from Winnipeg to Quebec. What I am concerned with is that this line was built primarily for the purpose of carrying the grain of the western prairies to the eastern seaboard by the most direct route, with the best levels; and we have those conditions in this north line of the Transcontinental. But if we build railways and then make rates prohibitive we are not going to use them as they were meant to be used. If the line under consideration we want the minimum rate, not the maximum. I notice, in looking at the rates on grain that the average rate per bushel from Fort William to Buffalo is 2.88 cents and the average to Port Colborne, a Canadian Port, 3.46 cents. These places are just a stone's throw apart, as compared with total distance. The figures I gave were the average figures for 1924, and can be found in the report of the Grain Trade of Canada, 1924, at page 158 table 113. That is, very much like a preference in favour of American ports. If I read it right, I believe that before a committee of this House some two years ago Mr. Symington stated that grain was carried on the North Transcontinental line to Quebec or Montreal at the rate of six cents per bushel, and that the railways did not suffer a loss. To-day the rate is over three times that amount. Rates have been lowered elsewhere, but not there. I have tables here showing the rates from St. John to the United Kingdom and continental Europe, with which I shall not trouble the House. You will find that sometimes the rate for long distance is less than that for a shorter distance, depending on the trade conditions. There are many peculiar things in connection with the grain trade. If we send a car load of grain from Alberta to the coast the rate is twenty-one cents per 100 pounds, if the grain is for export. If it is for us, in Vancouver or somewhere on the coast, the rate is nearly twice as great. It is argued and argued correctly that you can send grain to China or Japan at a cheap rate that you can send it for home consumption to the province of British Columbia. No doubt that of the rate on all railways, but why should there be such a wide spread? Why should not the people of British Columbia, where there is a large potential market for poultry feed, be able to buy grain from the prairie provinces at a reasonable rate? The thought of a box of apples from British Columbia, bought on the prairies at as high as 125 per cent more than the freight on a similar box of apples shipped a similar distance in the eastern provinces. We do not understand why it should be, but there are the facts. But in spite of all this wheat in Canada is succeeding, and I want to see the freight rates equalized mile for mile.

BLACKFALDS

On the 19th inst. two of our popular young people in the persons of Henry McLennan and Miss Francis Bille were united in the holy bonds of matrimony, the ceremony taking place in Calgary. The happy couple after spending a few days of honeymoon in Banff, returned home, taking up duties on their farm one mile west of town. Upon their return home on Saturday last, a number of their friends gave them a real serenade, and presented them with a number of pieces of silverware as tokens of remembrance.

We are sorry to relate the sad intelligence of the sudden death of Mrs. Lawrence Bailey, nee Miss Fanny Hall, in California. The body is being brought here for interment. Her parents Mr. and Mrs. Hall, living here and the other friends, have the deepest sympathy of the entire community in this their sad bereavement.

The Blindman S.S. picnic was rather a unique occasion, being held last Wednesday at the South end of Jack Fish Lake, when after a splendid dinner, the sports of unusual variety were indulged in to the delight and pleasure of all. A number went in for a swim after the sports, and the gathering ended up with a liberal treat of ice cream.

Another excellent rain, during the week has helped the crops and the laurist will soon be with us. Prospects at present are the best for years. No serious damage has come, and the farmers are very optimistic.

BENTLEY

The village streets are now worthy of the name, the work recently done has been a real improvement.

The village and country people are all smiles as a result of the fine rains we have had during the last week. We have not suffered any from lack of rain this season.

The farmers of the district shipped considerable wool last week, most of them reporting good returns from their flocks.

Mr. John McQueen, Druggist, has closed his store and is leaving Bentley.

Mr. M. Saint reports the purchase of a new car—Stor by name, but maintains it will not drive itself.

Mr. Tom Lorimer spent a few days in Calgary last week.

Mr. P. Wilton, of Bentley Creamery, shipped a carload of butter to Calgary this week. This shipment of 23,360 pounds represents four weeks' output.

Mrs. Amell, Accorn, Paul, Hayman and Towler, of Lacombe and their families were visitors at F. W. Thorp cottage at Brownlow's Landing, Sunday.

Coming Events
Picture Show: Saturday—Night. "The Trouble With Wives."

CEREAL CROPS FIELD DAY AT EXPERIMENTAL STATION

Lacombe, Saturday, August 7th
The recent rains have caused a dour growth and everything at the Experimental Station will be seen at its best. There will be something to interest every member of the family. While possibly only the men will be interested in the 4,000 or more grain and forage crops, plots, the women and children will be interested in the horses, cattle and hogs, the bees, the poultry and vegetable gardens. Every citizen will enjoy seeing the beautiful grounds and the profusion of perennial and annual flowers. One of the most interesting features will be the drive around the farm which will start at 1:30. Come early and bring your lunch and spend a day of pleasure and profit at the Experimental Station, Lacombe, on Saturday, Aug. 7th, 1924.

F. H. Reed, Superintendent

aunt, Mrs. A. Burchiel, of Glencoe, Ont., and his sister Mrs. A. W. Griffith of Alton, Ont. After dinner they motored to Gull Lake and spent the afternoon in boating and bathing. Those present were Mr. and Mrs. A. Saunders, Sr. and family, Mr. Tom McConnell of Wynyard, Sask.; Mrs. Tommish and family of Big Valley; Mr. and Mrs. Richard Acton and family; Mr. and Mrs. T. H. Saunders and family; Mr. and Mrs. H. R. Dool and daughter; Mr. and Mrs. A. Saunders and family; Mr. and Mrs. Will Swanson and daughter. Everybody went home well pleased with a day happily spent together.

JOFFRE NEWS

Mr. and Mrs. O. C. Smith and children of Okotoks, are visiting Mr. and Mrs. J. I. Smith.

Mr. Tulenberg and Mr. Leng returned from Banff on Saturday.

Mrs. Donlevy and Reta left for Vancouver on Wednesday.

The Winnipeg Blue Bird Orchestra now playing at Spysaw Lake will play in Joffre Hall on Aug. 28th. Dancing to commence at 10 o'clock.

Joffre and Red Deer played football on Joffre grounds on Wednesday evening; Joffre won by 1 goal.

Mr. and Mrs. Richardson were at home Wednesday to about 50 guests. Geo. Lee spent the week end at Rimbey.

There will be a picture show in Joffre Hall, July 31st at 8:30.

Mr. and Mrs. King of Bonni; Gies also Mr. and Mrs. Wager of Wetaskiwin returned home Sunday after spending the week end the guests of Mr. and Mrs. Peters.

Mr. and Mrs. Middleton spent part of the week in Edmonton, attending the fair.

Mr. and Mrs. L. Beau and daughters were the guests of Mr. and Mrs. England during the week.

The Postal Department have installed a money order service at Blades Post Office.

LOCKHART RAINBOW CLUB

Among the outcamps at Gull Lake this year, was the Rainbow Club of Lockhart, who provided a two weeks' holiday for the young girls of the community. The camp was in charge of Mrs. Reid and Mrs. Malcolm, and the youngsters had a splendid time. They made their headquarters in the Kitchen cottage, and spent their days bathing, hiking and other amusements. The girls were: Lily Garry, Lily Miller, Hazel Malcolm, Jessie Malcolm, Leona Saint, Margaret Cairns, Mary Papp, Gladys Fraser, Margaret Fraser, Louise Boddemo, Berle Beddoes, Edith Jaffray and Annie Malcolm. They all had the time of their young lives, and look forward to another outing already planned for next year.

BAPTIST CONFERENCE AT LACOMBE

Delegates from the four western Provinces of the Baptists Union held a conference in the Baptist Church on Wednesday to hear the report and financial statement of each province. The Union is in a very healthy condition, financially.

The delegates present, Manitoba: M. L. Orchard, E. J. Terr, Mrs. J. N. MacLellan, R. J. Smith.

Saskatchewan: W. P. Reekie, E. E. Anderson, J. A. McRae.

Alberta: Mr. Carpenter, Thomas Underwood, J. Paul Erickson, Mrs. Thomas Underwood, W. P. Freeman, British Columbia: J. W. Litch, Dr. Wolverson, G. A. Reynolds, J. J. Jones, Mrs. Staines, J. A. McRae acted as secretary of the convention.

Introductory Violin:
Frank Dyke, Pass.

Angus Macaulay, Pass.
Freddie Stewart, Pass.

FOOTBALL

In the Red Deer Fair Cup matches, Lacombe defeated Joffre 1-0 on Thursday at Red Deer, tonight (Friday) Lacombe play Red Deer in the final at Red Deer.

SUDDEN DEATH OF CHAS. S. REYNOLDS

The district of Lockhart was startled to learn of the sudden death of Mr. Charles S. Reynolds, which took place at his home on Wednesday, July 24th.

Mr. Reynolds was in his usual good health when he retired to bed, and was in Ponoka the day before. About three a.m. he was stricken with apoplexy and passed away in his sleep.

Deceased was one of our best known and most highly respected farmers, and his sudden death will be regretted by many. Born in Nova Scotia, he was aged 67 years and 5 months. The family came to Alberta in 1906, and settled in the Lockhart district, where he had prospered and held valuable holdings.

He was a splendid neighbor, kindly and of a cheerful disposition, his place will be hard to fill in the community.

Besides Mrs. Reynolds, he leaves two sons, both farming in Lockhart

District, and one daughter, Mrs. M. Crandall, of Ferrybank.

STANLEY G. TOBIN WETASKIWIN CANDIDATE

Wetaskiwin, July 27.—Mr. S. G. Tobin, former member, will be the Liberal candidate again for Wetaskiwin in the forthcoming federal campaign. This was decided on Monday afternoon, when a Liberal convention in the Angus Theatre, Wetaskiwin, gave Mr. Tobin an unanimous nomination. Names of no other candidates were submitted.

Addresses were given by the newly elected candidate and by Capt. J. C. Bowen, ex-M.L.A., political questioner of the day being dealt with.

Mr. Tobin made a sensational first last election, has a pleasing personality, a strong campaigner, and is sure to make a strong bid for the seat.

MORNINGSIDE

Dr. and Mrs. Peterson with their sons Cody and Jack, visited with Mr. and Mrs. Bowie and other friends in Morningside over the week end.

Also Bowie who has been holidaying at North Cooking Lake, returned home last week.

Mrs. Clark of Toronto is visiting at the home of Mr. and Mrs. Sutherland.

Do not forget the ice cream social which is to be held on the lawn of Mr. and Mrs. Murdoch's, Friday evening, July 30.

A free open air concert will be given. Dinner served cafeteria style. The small sum of 5c. will be charged for each article of food sold. Admission to the grounds free. Come and have a good time.

O. S. A. FIELD DAY

A farmers' Field Day is to be held at the Old School of Agriculture on Thursday, August 5th. The purpose of the occasion is to provide a means that will give those who attend an insight into the crop and soil field work at the O.S.A., and also obtain some valuable information on farm problems.

Make the occasion a picnic outing. Attend with the family. Bring your lunches. The O.S.A. will supply Tea, Coffee, Milk, and facilities for games. Everybody welcome.

Short News Items

WORLD HAPPENINGS BRIEFLY TOLD

The military committee of the preparatory disarmament commission adjourned until August.

Thirty-one deaths and damage estimated at \$3,000,000 are attributed to the recent storms and floods in Germany.

Dr. Otto Ludwig, Weldfield, former German ambassador to the United States and director-general of the Krupp Works, died July 5.

The Swedish Government, growing tired of having so many drownings every year, has started a drastic campaign to force everyone to learn to swim.

Joseph Courtenay, 77, veteran of the Riel Rebellion in 1885, at one time Indian agent at The Pas, Man., and also connected with the Indian department at Prince Albert, is dead at New Westminster. He was a native of Ireland.

Seven marshals of Italy, in addition to the King and Premier Mussolini, have promised to be present at the elaborate ceremony when the foundation of the Victory Monument is laid at Robano, Italy.

Advisors from Lent say enormous damage has been caused in a large section of Upper Austria by floods, caused by cloudbursts. The dispatches say there has been loss of life but no figures are given.

The administration of the Hohenzollern family has notified the Prussian state of the willingness of its clients to resume negotiations concerning the disposition of the property in the state owned by the former royal family.

The London Daily News' political correspondent states that Lord Blyth's action in refusing discussion to former Premier W. L. Mackenzie King will be brought up for discussion by one of the Dominion premiers at the Imperial conference in October.

The United States submarine S-51 rammed and sunk off Block Island by the steamer City of Rome last September, was towed to Brooklyn, N. Y., by the submarine, which had had 33 aboard, when it went down, was raised after a series of unsuccessful attempts. It is believed the submarine contains the bodies of 22 sailors.

Equal Political Rights

British Women Under 30 to Fight for Franchise

British women are about to open a vigorous fight to do away with present suffrage laws which exclude them from the right to vote until they are 30 years old.

Many prominent men have agreed to join a great mass meeting staged by forty women's societies in the interest of equal political rights. Among them are Lord Curzon, Lord Cecil and Lord Lawrence, M.P.

George Bernard Shaw, the noted playwright, however, has declined to participate.

Under the present suffrage laws in England, 5,000,000 women above the age of 21, but below the age of 30, are unable to vote while qualified men above the age of 21 have the ballot.

All the old time suffrage leaders and thousands of other prominent women resent this discrimination.

Fail To Scale High Peak

Mountain Climbers Experience Hardships in British Columbia

Repulsed by British Columbia's 13,600-foot "mystery mountain" after a 32-hour struggle for victory across huge glaciers and hidden snowfields in the highest unexplored heart of the interior, an Alpine Club expedition came close to facing actual starvation on the homeward trip, according to members of the party who returned to Vancouver. They spent five weeks in subsiding themselves of a shortage of such a great peak within 150 miles of Vancouver and in sight of the city.

The climbers reached an altitude of 10,000 feet on June 21.

The Star Spangled Banner

Congress Effort to Censor Famous Battle Hymn With Demand It Be Made National Anthem

A demand that the United States Congress officially declare the "Star Spangled Banner" the national anthem was made in the House at Washington in Representative Lusk's Maryland, Democratic, as a result of the attempt in New York to censor the words of America's patriotic hymn.

The controversy hinges on the question raised by Mrs. Charles R. Smith, housewife of New York, who said she sang from a recent independence celebration on the ground that the words might offend some French people who were present.

Divorces Are Delayed

Introduction of perjury in divorce cases has caused a delay in the divorce bills that have already passed both houses of parliament and were awaiting royal assent. Thirty-five divorce bills had passed the House and were still in committee stage of the House.

It is rather a curious fact that the three popular languages, English, French and German, all were introduced into Europe within a few years of each other.

W. N. U. 1637

To Make Film At Jasper

Screen Feature Portrayed in Magnificent Settings of Canadian Rockies

Jasper, the world's largest national park is to provide the setting for one of the great moving picture epics of the year. "The Country Beyond," an adaptation of the story of that name by James Oliver Curwood, which is being produced by the Fox Film Corporation under the personal direction of Mr. Irving Cummings. The cast, which is a notable one, includes such stars as Olive Borden, J. Farrell MacDonald, Ralph Graves, Fred Kohler and Lawford Davidson, as well as a number of others of outstanding ability.

Two sections of the park have been chosen by Mr. Cummings as the setting for his play. Recently the company started work beside the lakes of the Lake of Forgiveness, which lies in the shadow of Mount Edith Cavell, and about 10 miles from Jasper Park Lodge, on the shore of Lac Beauvert, the preliminary work is being carried on. Later the entire company will move by pony trail to Maligne Lake, where the remainder of the picture will be filmed.

The work will occupy about three weeks and it calls for an expenditure of almost a quarter of a million dollars.

Never before has Hollywood come so far north to film a picture. It is the first time in the history of the motion picture industry that a complete screen feature has been produced north of the international boundary.

Synthetic Wood From Sugar Cane

Inventors Have Found Material That Makes Good Substitute For Lumber

Potential houses, railway cars and packing boxes in every waying field of sugar cane.

As the sweetening power goes out, building possibilities lie in the residue and waste, for synthetic wood is now made of the crushed stalks. The new industry is spreading across the Mississippi Valley from New Orleans, the heart of the sugar country. From one three-million-dollar cane wood plant there is more than 200,000,000 feet of wood substitute is shipped out in a year.

The substitute has been used in place of wood sheathing on outer walls, for roof and wall insulation, as a base for plaster or outside stucco, for portable houses, refrigerators and rail vehicle refrigerator cars, in partitions for deadening sounds, in auditoriums for correcting acoustics, and for making cartons and packing cases.

Inventors have been experimenting with materials that might take the place of wood, against the time when use and misuse of the forests should be in a shortage of lumber. Eventually they tried bagasse, the name given to sugar cane when the sugar has been extracted.

Canadian National Earnings

706.71 Per Cent. Increase in Canadian National Railways Net Earnings One Month

Earnings statement issued recently by the Canadian National Railways shows an increase of \$2,856,425.56, or 706.71 per cent. in net earnings for May as compared with the same month of last year and an increase of \$8,740,860.91, or 209.38 per cent. for the five months period since the first of the year as compared with the same period of 1925.

Gross earnings for the month of May, 1926, were \$22,183,204 as against \$1,845,728 for May, 1925, an increase of \$19,337,476, or 215.88 per cent. Working expenses were \$18,526,938.67 for May, 1926, against \$17,856,793.23 for May, 1925, an increase of \$670,145.44, or 6.21 per cent. Net earnings for the month were \$3,656,265.33 as against \$529,939.77 for May of last year, an increase of \$3,126,325.56, or 706.71 per cent. The operating ratio for May, 1926, was 85.16 per cent. compared with 92.81 per cent. in the same month of last year.

Prince Has Worked Hard

Tireless Energy Has Won Admiration From All Classes

There are few young men in the world who have crowded so much activity and so much hard work into their early manhood. He has tackled the task of learning the duties of ruling in his high office, and of preparing himself for still higher duties, with an enthusiasm, a lively cheerfulness, and a tireless resolution that have won him the admiration even of those who are opposed upon principle to results in any form. Monarch of the world.

Canada Reverts to Gold Standard

Canada has now reverted to the gold standard. In other words, any holder of paper currency issued by the Canadian government or by any provincial bank in Canada may exchange his paper for gold if he wants to. Canada is now a gold standard country, but during the war found it necessary to float bonds in order to finance her war effort.

One respect for old age depends directly on whether it is applied to men and women or to household property.

Possibly the title has something to do with the numbers of knots made by a vessel.

The Tallest Building -

Detroit to Have Store and Office Building 873 Feet High

The city of Detroit has for long had the distinction of being the greatest automobile manufacturing centre in the world. It is soon to have another distinction, that of possessing the world's highest building. The famous Woolworth Building in New York, which has heretofore enjoyed the height record for buildings, is in to be eclipsed, and very materially.

Work has just been started on the new Book Tower, which is to contain 81 stories and is to be no less than 873 feet high. It will have 23 more stories than the Woolworth Building, and will be nearly 100 feet higher. This mammoth building will have a frontage of 225 feet on State Street, 220 feet on Washington Boulevard, and 180 feet on Park Place. The main portion of the building will be 42 stories high. Each floor of this portion will have 30,000 square feet of space. Above this, the tower, 120 by 125 feet, will rise 39 stories. On the top there will be the most powerful searchlight in the world. It will be visible for 75 miles.

Stores and shops are to occupy the first floor. The second, third and fourth floors will be occupied by banks, trust companies, and similar institutions. The remaining floors will be used as general offices.

The only structure in the world which exceeds the proposed Book Tower in height is the Eiffel Tower, in Paris, 960 feet high, but it is not a building. It is a steel frame.

Blames Sun For Rheumatism

French Priest Astronomer Says Sunspots Increase This Trouble

If your old rheumatism interferes with your golf or a bothersome tooth starts aching again, blame the sunspots. For we must now look forward to a period of rheumatic and neuralgia crises.

The Abbe Moreaux, famous priest-astronomer of the Bourges Observatory in France, is one of the most successful prognosticators of the weather of seasons in France, is the chief advocate of a theory which connects certain complaints of earthly humans with phenomena of the sun.

The Abbe said that it was not surprising that these sunspots increased the number of rheumatism and neuralgia of humans.

"Electricity acts directly on our nerve cells," he concluded. "Our own bodies, like those of lower animals, are subject to additional nervous excitement such as that caused by lightning, electrons thrown off by the sun strike our atmosphere and electrify its outer layers. So we must suffer for our nerves."

Queer Design For Plane

New Tailless Aeroplane Is Inspired by Prehistoric Lizard

A tailless aeroplane, whose inventor went for inspiration to the prehistoric lizard, the pterodactyl, and the new vertically rising helicopter, inspired by the spider, is being built by the principal designer, De la Cueva, at the annual display of the royal air forces at Hendon, in the suburbs of London.

The tailless plane is the invention of Captain G. T. R. Hill. It is a monoplane and its single pair of wings, slanting like the bat's wings of the pterodactyl, are attached to a short body that carries pilot, passengers and freight.

Objectionable Motor Signs

Move Made in New Jersey to Revoke Licenses of Motorists With Offensive Placards

Commissioner Hill, of the New Jersey motor vehicle department, said he will attempt to revoke licenses of motorists who display offensive signs beneath their windshields. Commissioner Hill said he believed this step was the only possible one to abate the evil. He added it was wrong to offend the public with placards on which profanity even was hinted at.

One of the signs to which he objected particularly reads: "If you can read this you are too damn close."

Okanagan Lake Service

New C.N.R. Steamship Service On Okanagan Lake

Announcement is made of the opening by the Canadian National Railways of a steamship service between Kelowna and Penticton on the Okanagan Lake. A new steamship, the "Penticton," will make two trips each way daily, except Sunday, starting July 15.

This service is the first of the kind which was put into operation with the completion some months ago of the new Canadian National line between Kelowna and Penticton and gives a complete service from Penticton eastward to the Continental Limited east and west from Kamloops.

Ripens Bananas Rapidly

A method of ripening a carload of green bananas at a cost of forty cents has been perfected by University of Minnesota scientists. Ethylene gas does the work.

It is impossible to suppress the man who imagines that he can tell a funny story.

The twenty-six letters of the alphabet can be transposed 620,401,448,732,239,129,369,000 times.

Distinctive in Line and Fabric

The dainty printed frock, the epitome of the new fashion, finds expression in the gracefully flaring lines of the model pictured here. Details that go to make the chic and successful frock for women of larger figure are combined in the softly modeled lines of the bodice, the deep V front opening, and scarf-like collar. Also, it adds to the smart different appearance which draws favorable comment from the observing public. The designs illustrated in our new Fashion Book are originated in the heart of the style centres and will help you to acquire that much desired air of individuality. Price of the book 10 cents the copy.

One Habit Japan Will Not Tolerate

Prefect of Police Recently Issued Statement Against Kissing

Kissing is decidedly under the ban in Japan, where the art of osculation is described as an "unclean and immodest habit." Recently the Prefect of Police in Tokyo issued the following statement:

"Kissing is a custom entirely foreign to Japan, and it is undesirable that it should be introduced into our country. It is unclean, immodest, indecorous, ungraceful, and likely to cause the spread of disease."

This "immodest habit" is so thoroughly repugnant to the Japanese nation that the wonderful statue, "The Kiss," by Rodin, the great French sculptor, sent to Japan for exhibition, has been placed in a public park with a huge bamboo screen around it, so that the sensibilities of the public may not be shocked.

Steady As A Rock

British Stability Alone Keeps Old World From Crashing

The British as a political people never yet stood higher in the respect and confidence of the world. If they were not steady as a rock through the thousand troubles crowding upon them in home and foreign and imperial affairs, there would be no hope of stability in Europe, and none of avoiding anarchy in Asia. In that sense we are the keystone of a ponderous arch, and if we fell the whole world structure of the old world would crash. In the eight years after the Armistice we are still holding firm, despite anxieties, disappointments, crisis, not even counting one at a time, but often besetting us from all quarters together in a way that might have worn out the heart and there is a less solid bond. London Observer.

Fish Fossils In Oil Well

In drilling an oil well recently near Medicine Hat, a stratum of fish and shell fossils was found. The fossils were struck at a depth of 3,720 feet, and it was apparent that they were being washed into the well. Other finds were reported from prairie and oil wells in Alberta, where the fossils were found at varying depths, the shallowest being about 250 feet down.

Women Taking Up Law

Six more women have been called to the bar in London, indicating that an increasing number of them are taking up the legal profession as a means of livelihood.

Not A Blow

"Gracious, but you were gone a long time," exclaimed Nell. "Have a blowout!"

"No," replied Ada in disgust. "He never spent a cent!"

How Russia Conveys Money To Strikers

Sent to Communists By State Mails Says Whitehall Gazette

The methods by which Russian money for the striking British miners was sent into England during the general strike, and is still being sent, is described in the Whitehall Gazette as follows:

A sum of money, in one pound and five pound notes, is placed in a red envelope in Moscow. This envelope is placed in a diplomatic valise, and the whole is consigned to one of the secretaries of the Soviet Legation at London. He, in his turn, passes the envelope, unopened to a woman—a member of the (British) Communist party. This woman meets a male member of the Communist party in a room in St. Bride Street (London). The man leaves St. Bride Street on a motorcycle for an unknown destination, believed, however, to be the head office of the Communist party.

Large payments, it is believed, are made in the form of cheques to members of the "underground" section of the Communist party, who are known only to two or three of the high officials. Most of these men carry on some sort of business, so that if the necessity arises they can prove that the cheques received by them from Riga, Berlin, Paris, Vienna, are legitimate business payments. A constant caller at the offices of the Miners' Federation has been identified as an official of the Soviet Legation in London.

New British Industry Growing

Firms Making Artificial Silk See Infinite Possibilities in New Material

The rise of the artificial silk industry is marvellous. Scarcely more than two or three years old, already one British firm alone supplies one-third of the world's demand for artificial silk. The assets of this company are valued at \$100,000,000. A plant in Coventry delivers seven miles of artificial silk thread a second—made of pinewood pulp. Ten thousand workmen in Bradford are employed to dye this product. The output of Lancashire turns out fifty thousand pairs of artificial silk stockings a year. The Lancashire cotton weavers are adapting their mills to the industry. This new material, at once utilitarian and beautiful, has become the staple fabric for shawl, stockings, dresses, underwear, and its possibilities are only something short of infinite.

It is a fascinating story and a heartening one. It shows there is life yet in the old dog John Bull, notwithstanding all the croakers. And it shows, incidentally, that the contrary of the proper name for artificial silk is a serious matter. For it is certain that this silk by any other name is destined to be a household word in all the world.

Criminals Of The East

Accomplished Western Crook Cannot Compete With Them In Cunning

The criminals of the east are far more subtle, cunning, patient, painstaking and adroit than the most accomplished crook to be found in the west. Therefore, if it naturally follows that the task of catching him must be much more difficult.

As is generally known, the head police officials in India are British, although they have the assistance of native experts. There is a native detective in Bombay—a kind of C.I.D. Man—who at crime investigation could make our best Sherlock Holmes look pretty shabby.

He is a genius at disguise and knows every twist and turn of the Asiatic mind. He is a crook in a crook or crime in India with which he is not familiar. The most exciting story to be found in the records of Great Britain is a mere prosaic fact of facts compared with many of the astounding exploits of this Bombay shikari.

Means Of Identification

Newspaper Reporters in Paris Occasionally Wear High Hats

Paris newspaper reporters may wear high hats when covering assignments where trouble is likely to arise. Not as a matter of protection, but of identification.

Instances of reporters being injured in street frays have grown quite common, and the police are growing more cautious, but because they are unable to distinguish between rioters and reporters. French news writers are beginning to appear on the scene of manifestations rather than remaining behind police lines and waiting for the news to reach them as once was the custom.

Largest Electric Locomotive

Driven By Six Motors Has Had Trial Trip At Bern

The largest electric locomotive in the world, constructed by Geneva engineers, was successfully tested in its first trial-trip at Bern. The monster weighs 282,350 pounds, is more than twenty metres long and is driven by six motors, with a total force of 4,500 horsepower. The locomotive, which can be driven by one man, can easily attain a speed of more than 100 miles per hour hauling an express train. It will be shortly employed upon the International Electric Line of Bern-Lötschberg-Simplon, where the present service will be accelerated.

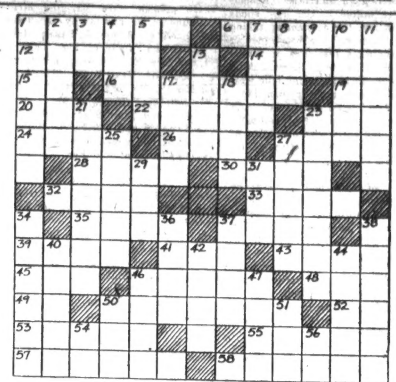

Whale Killed By Steamer

The Berings, one of the largest of the Atlantic steamers, was shaken from stem to stern and a passenger almost thrown overboard when the vessel struck a whale off the English coast recently. The whale, one of a school of six, was instantly killed.

Giving good advice is all right if we give it to ourselves.

The stories of talkative barbers are often illustrated with original cuts.

OUR CROSSWORD PUZZLE

Horizontal
1—Conveyed.
4—Basis.
12—Violent.
14—Welch.
15—Salar (abbr.).
16—Called, named.
19—Steamship (abbr.).
20—Strike gently.
22—Infinitely.
23—Small bed.
24—Lake.
26—Nas.
27—Cornmeal bread.
28—Appaid.
30—Flowerless plant.
32—Pierce.
33—Lap.
35—Indian tribe (Poss.).
37—Assistants to a general.
38—Prior.
41—Personal pronoun.
43—Rim.

Vertical
1—Throat.
2—Place of prayer.
3—About.
4—Endower.
5—To engrave.
7—Pay attention.
10—Foe.
11—X.
16—Bovine ruminant.
17—Six the stanza.
18—Leader.

45—Expression of disapproval.
46—Shell carving.
48—Fish.
49—Stuffs; oil.
50—Leaping.
52—Overhead railroad (colloc.).
53—Extricate again.
54—Army.
57—Barterer.
58—Short poem.

17—Jump.
18—Professor (abbr.).
21—Likeness.
23—Allow.
25—Exile.
27—Concise.

47—Alop.
49—Foe.
51—X.
54—Davyum (c h e m. symbol).
56—Article.

Cures Effected By Artificial Sunlight

Tuberculosis Successfully Treated By Röntgen Electric Lamps

Artificial sunlight, produced by Röntgen electric lamps, is effecting a high percentage of complete cures for tuberculosis of the lungs, throat and intestines. It was said at the 16th annual meeting of the Medical Society of New Jersey, at Atlantic City.

That locally and climate have no great effect, and that the ordinary home can be made to supply all the advantages of any tuberculosis sanatorium was also asserted.

"Röntgen rays attack tuberculosis glands," said Dr. E. A. May. "The disease then disappears within a short time, and even open sores and abscesses dry up and heal quickly. In tuberculosis of the intestines the effect of the rays is sometimes miraculous. Röntgen treatments, however, should be given only by a specialist, as even a slight overdose may do irreparable damage."

Thames Has Double Ebb

Vagaries of River in London Has Attracted Attention

Vagaries of the Thames River in London aroused more than ordinary interest recently when there was a double ebb and flow of the tide. The inundation was not only rare but at times it is difficult to explain. Before the Thames was embanked, however, its vagaries were more frequent than now. In the seventeenth and eighteenth centuries it was reported to have had double tides and in 1658 it ebbed and flowed twice in three hours. In 1662 three tides in four hours were recorded.

Means Of Identification

Newspaper Reporters in Paris Occasionally Wear High Hats

Paris newspaper reporters may wear high hats when covering assignments where trouble is likely to arise. Not as a matter of protection, but of identification.

Instances of reporters being injured in street frays have grown quite common, and the police are growing more cautious, but because they are unable to distinguish between rioters and reporters. French news writers are beginning to appear on the scene of manifestations rather than remaining behind police lines and waiting for the news to reach them as once was the custom.

Smugglers Reaping Fortunes

Profits Are Enormous on Silk Stockings Taken Into Rumania

Bootleggers in silk stockings are reaping fortunes in Rumania. There is a prohibitive duty on articles "du luxe" generally. But the Rumanian woman, who is the best-dressed in the Balkans, demands these articles at any cost.

Bootleggers, many of them women, smuggle and sell thousands of pairs of Parisian silk hosiery. Their profits are enormous. Last year the government confiscated 400,000 worth. Silk stockings of the best quality sold in Rumania \$10 a pair. A suit of silk lingerie costs \$25 to \$35.

Radio Assists Growth of Plants

That vegetables grow by growing by wireless means is the claim of an amateur gardener of West Bridgeford, England. He says he noticed that tomato and cucumber plants were drawing energy from his aerial and making wonderful headways. Plants 18 feet long are said by him to have yielded 35 cucumbers, some two feet long.

No man ever travelled over the road to fame on a pig.

M. D. CROWN 399

The council of the above district met in the Municipal Office there being present Councillors Ellis, Madden, Gibson, Sissons, Foran and Bradley.

The minutes of the previous meeting were read and it was moved by Foran that they be adopted as read.

Sissons: That the council endorse the resolutions passed at the Weeds' Inspectors' convention at Oia.

Bradley: That the offer of Cecil O'Harey of road across the N.W. 11-41-26-4 be accepted.

Bradley: That the Secretary request the Department to exchange the old road between the S.E. 29-41-26-4 and N.E. 29-41-26-4. And the Municipal District will pay C. G. Murdoch the sum of twenty-five dollars for moving of fence.

Sissons: That a grant of one hundred dollars be given to the Lacombe School fair.

Sissons: That the Secretary be instructed to pay Birch Lake School District the sum of one hundred dollars on account of second quarterly payment.

Sissons: That the appointment of John Russell, F. A. Billinghurst and Wm. McNaughton as Weeds Inspectors be ratified by the Council.

Bradley: That the action of the Reeve in appointing Ed. Butcher as pond keeper on the S.E. 13-41-27-4 be ratified by the Council. Notice to be posted on the gate.

Sissons: That the sum of fifty dollars be ordered paid to Mrs. Wm. Newton as a grant for the rest room.

Ellis: That part of the N.W. 26-38-26-4 (4.34 acres), be leased to G. A. Diggins for the sum of ten dollars.

Bradley: That the tender of H.D. Welton for lots in Hyde Park be accepted. \$130.00.

Ellis: That a grant of one hundred dollars be given to the Salvation Army.

Amendment: Madden: That a grant of fifty dollars be given to the Salvation Army. Lost. Madden and Foran voted for.

Foran: That the following Labor Pay Sheets be passed and the Treasurer instructed to pay the same: Eng. No. 1, \$1,130.00; C1, \$130.00; D1, \$251.35.

Ellis: That an appropriation of \$1,000.00 be given to each division for current expenditures and those divisions having a credit from previous years can expend that amount also.

Madden: That the following accounts be passed and ordered paid: Premier Lbr. Co., \$36.66; C. P. R., \$404.91; Central Alberta Sanatorium, \$445.50; Bingo Products, \$44.65; Morrison & Johnston, \$10.65; Richardson Co., \$15.00; Ferguson Supply Co., \$235.30; E. Plumb, \$15.00; John Casey, \$62.50; J. Morgan, \$6.00; W. McDermott, \$15.00; C. B. Halpin, \$19.50; B. A. Sawyer, \$23.50; Central Garage, \$10.50; F. Shaw, \$19.85; Lacombe Home, \$31.00; King's Printer, \$2.50; Telephone, \$6.35; Atlas Lbr.

Gibson: That the following accounts be passed and ordered paid: Workmen's Compensation \$100.00; J. D. Waterman \$1.75; King's Printer \$3.70; Bingo Products \$44.65; Postmaster \$25.00; W. Gordon \$50.00; Lacombe Home \$30.00; Ceb. Alta. Sanatorium \$45.00; Mrs. Dorsey \$1.00; A. Olsen \$33.00; F. J. Bills \$7.00; H. Richardson \$75.01; E. O. Grimes, \$40.00; R. M. Gibson, \$75.00; Royal Bank \$20.00.

Gibson: That councilors fees be paid according to Section 61, Chapter 41 Mun. Dist. Act.

Sissons: That the Reeve and Secretary be empowered to borrow the sum of \$4000.00 being for school purposes.

Sissons: That an appropriation be allowed to the several divisions as follows, for current expenditures, Div. 1 \$2500.00; Div. 2 \$1500.00; Div. 3 \$1500.00; Div. 4 \$1500.00; Div. 5 \$1500.00; Div. 6 \$1500.00.

Ellis: That the Reeve and Treasurer be empowered to borrow \$4000.00 being for current Municipal Expenditures.

Madden: That on and after the 10th day of July, 1926, that by-law be enforced and the Reeve is hereby instructed to have all cattle or horses or other animals running at large on road allowance within the Municipal District of Crown No. 399 impounded and that this resolution be published for one issue of the Red Deer and Lacombe papers.

Ancient and Modern Meet in Rockies

Upper—Leather spring coach, used to travel in Rockies before the motor car age. Lower Left—Modern light-sewing car of today. Lower Right—Motor car of 1902, used in the Canadian Rockies.

As the evening shadows began to lengthen across the Bow Valley in the Canadian Rockies on the last day of May, a diminutive time-worn, rust-biten, two cylinder motor car of 1902 vintage chugged through the portals of the Rockies into Banff, there to join the throng of motor cars on Banff Avenue and unwittingly form a historic pageant indicating the developments in motor transportation during twenty-four years.

As it happens at such times, the shades of the past arise to refresh the memories of old-timers and bring forth reminiscences indicating the progress made within recent years. And so with the shades of the past evoked by one of the first "horseless carriages," mingling with its glittering brothers of the modern age.

When it too glittered with newness the mountain valleys knew not the odor of gasoline and the ordered roar of the exhaust, the old-timer onlookers said. No fine pavements such as at present grace the streets of the famous mountain resort, smoothed out the irregularities. The dirt surface of Banff Avenue knew only pedestrian, saddle and pack-ponies, and the iron tired wheels of the lumbering leather spring coach, used as the first light-sewing vehicle in the Rockies.

In 1916, the Canadian Government opened the park gates to motor travel. In 1926, the motor sight-seeing equipment, used to carry passengers by motor

through the Rockies from the Banff Springs Hotel to the chain of other Canadian Pacific railway hotels and bungalow camps, numbered a hundred modern motor cars and sight seeing buses. In 1926, the system carried 226,000 passengers a total of approximately a million miles in three of Canada's mountain national parks. Thirty-six thousand motor cars, carrying 125,600 holidaymakers, passed through the gates of the Kootenay and Banff National Parks during the same season.

On June 16, the new Lake Louise to Field Highway was opened to the motorist, uniting the three national parks by motor road and increasing the grand total of modern highway in the mountains to approximately 230 miles. But when the diminutive motor vehicle was the latest creation in automobiles, the mileage of roads in the mountains could be counted on the fingers of both hands.

The day following its arrival in Banff, E. Stacey, Kelso, Washington, filled the gas tank of the 1902 car and set out over the Banff-Windermere Highway enroute for home. He is driving the car from Edmonton, Alberta, where it recently won the first prize in the light car class of the old car contest conducted by the Edmonton Journal.

In crossing the two summits on the highway, a modern car was called into action to aid the ancient vehicle over the top. By afternoon it reached Redoubt Bungalow Camp at the south end of Kootenay National Park, where the owner called it a day after covering ninety miles.

instructed to have all cattle or horses or other animals running at large on road allowance within the Municipal District of Crown No. 399 impounded and that this resolution be published for one issue of the Red Deer and Lacombe papers.

Foran: That the meeting adjourn to call of Secretary.

June 29, 1926.

W. R. Hull, Provincial Prohibition Secretary visited the Baptist Camp the first of this week.
